

ZOREE TMS · ONE PLATFORM, FIVE OUTCOMES

Visibility.
Efficiency.
Compliance.
Cost.
Service.

Freight planned, tendered, tracked and settled — 34+ modules on one data model.

Swipe for the tour →

WHY A TMS

What companies actually get out of it

01 Planners do planning

Automated planning and tendering moves people onto higher-value work.

02 Freight you can budget

A single source of truth makes transportation easier to procure.

03 Scale without headcount

Integrated TMS grows volume without growing the team.

PROCESS COVERAGE

One workflow, order to payment

10 **Transportation planning**

Release orders, plan, consolidate, review.

20 **Shipment execution**

Tender loads, coordinate carriers, allocate costs.

30 **Tracking & notification**

Carrier events, exceptions, alerts.

40 **Freight invoice capture**

Validate references, match invoices.

50 **Freight invoice audit**

Verify against shipments, approve and pay.

PLANNING

Every load rate-shopped, every run

- **TL, LTL and partial compared**
Across every contracted carrier, in one call.
- **Consolidation is automatic**
Orders grouped by lane, saving shown per move.
- **Dock slots at plan time**
Shipments priced and appointment-ready in one step.

EXECUTION

Tender it, then watch it move

- **One-step tender**

Full load detail by email or EDI — no spreadsheets, no calls.

- **Carriers self-serve**

Accept in the portal, upload PRO numbers and documents.

- **Live map, real events**

Every shipment on HERE Maps; exceptions surface early.

A co-planner, not a chatbot

"Find the cheapest compliant carrier for Dallas to Memphis tomorrow."

"Plan all open orders for this week, then tender them."

"Why is the CHI–ATL lane more expensive this month?"

Each one runs on live orders, rates and carriers — and executes.

DELIVERY

Live in 12 weeks, included in every plan

W 1–2

Design and demo

Out-of-the-box demo in week one.

W 3–5

Rates and carriers

Contracted rates loaded and validated early.

W 6–9

Integrate and pilot

One lane run end to end, order to invoice.

W 10–12

Go live and scale

Lane by lane, with a named specialist.

No consultants. No six-month IT programme.

See it running.

Full walkthrough on our website, or book a client-specific demo.
